

# Creating App passwords for google account Scribe<sup>®</sup>

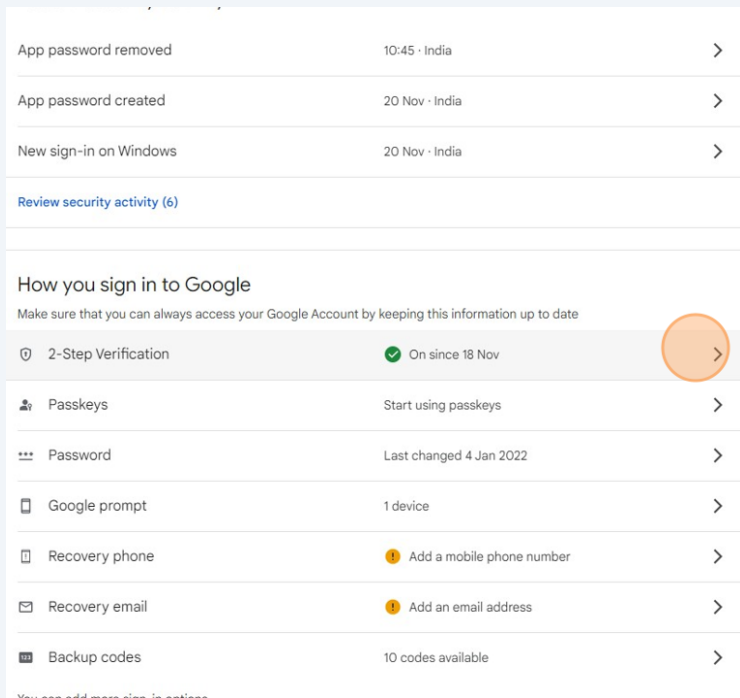

1 Navigate to <https://myaccount.google.com/>

2 Click "Security"

3 You'll have to setup 2-Step Verification if haven't done so already.

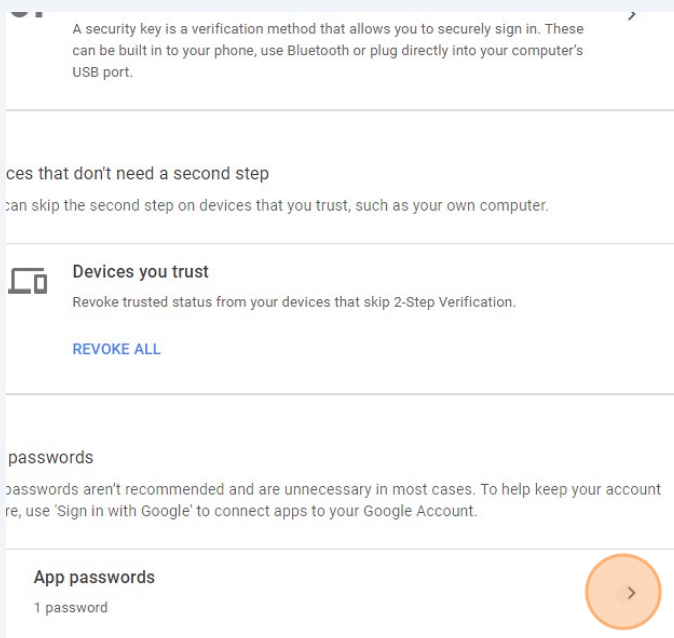

## 4 Click "2-Step Verification".

The screenshot shows the 'Security' page of a Google Account. At the top, there's a list of recent security events: 'App password removed' (10:45 · India), 'App password created' (20 Nov · India), and 'New sign-in on Windows' (20 Nov · India). Below this is a link to 'Review security activity (6)'. The main section is titled 'How you sign in to Google' with a subtitle 'Make sure that you can always access your Google Account by keeping this information up to date'. It lists several sign-in methods: '2-Step Verification' (On since 18 Nov, highlighted with an orange circle), 'Passkeys' (Start using passkeys), 'Password' (Last changed 4 Jan 2022), 'Google prompt' (1 device), 'Recovery phone' (Add a mobile phone number), 'Recovery email' (Add an email address), and 'Backup codes' (10 codes available). Each item has a right-pointing arrow.

Method	Status	Action
2-Step Verification	On since 18 Nov	[Arrow]
Passkeys	Start using passkeys	[Arrow]
Password	Last changed 4 Jan 2022	[Arrow]
Google prompt	1 device	[Arrow]
Recovery phone	Add a mobile phone number	[Arrow]
Recovery email	Add an email address	[Arrow]
Backup codes	10 codes available	[Arrow]

## 5 Scroll to the bottom and Click "App passwords"

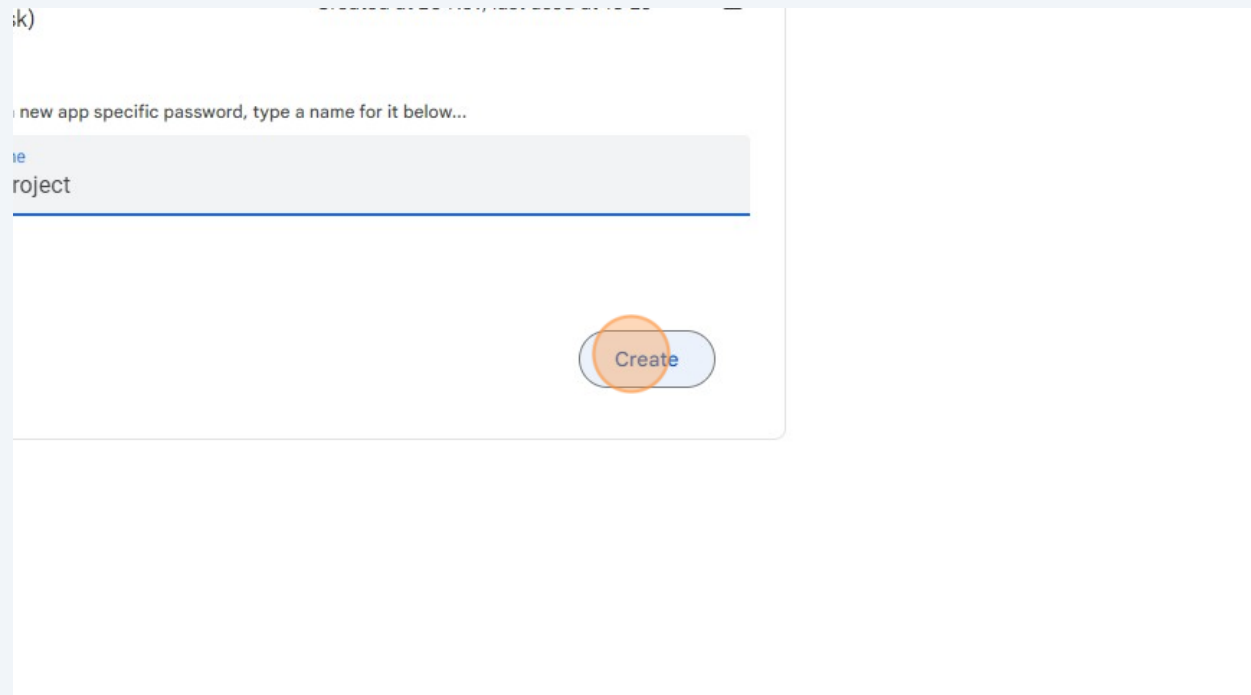

The screenshot shows the 'Security' page of a Google Account, scrolled down. It features a section titled 'A security key is a verification method that allows you to securely sign in. These can be built in to your phone, use Bluetooth or plug directly into your computer's USB port.' Below this is a section 'Devices that don't need a second step' with the text 'You can skip the second step on devices that you trust, such as your own computer.' and a 'REVOKE ALL' link. Further down is a section 'App passwords' with the text 'App passwords aren't recommended and are unnecessary in most cases. To help keep your account secure, use 'Sign in with Google' to connect apps to your Google Account.' and a sub-section 'App passwords' with '1 password' and an orange circle highlighting the right-pointing arrow.

1 password [Arrow]

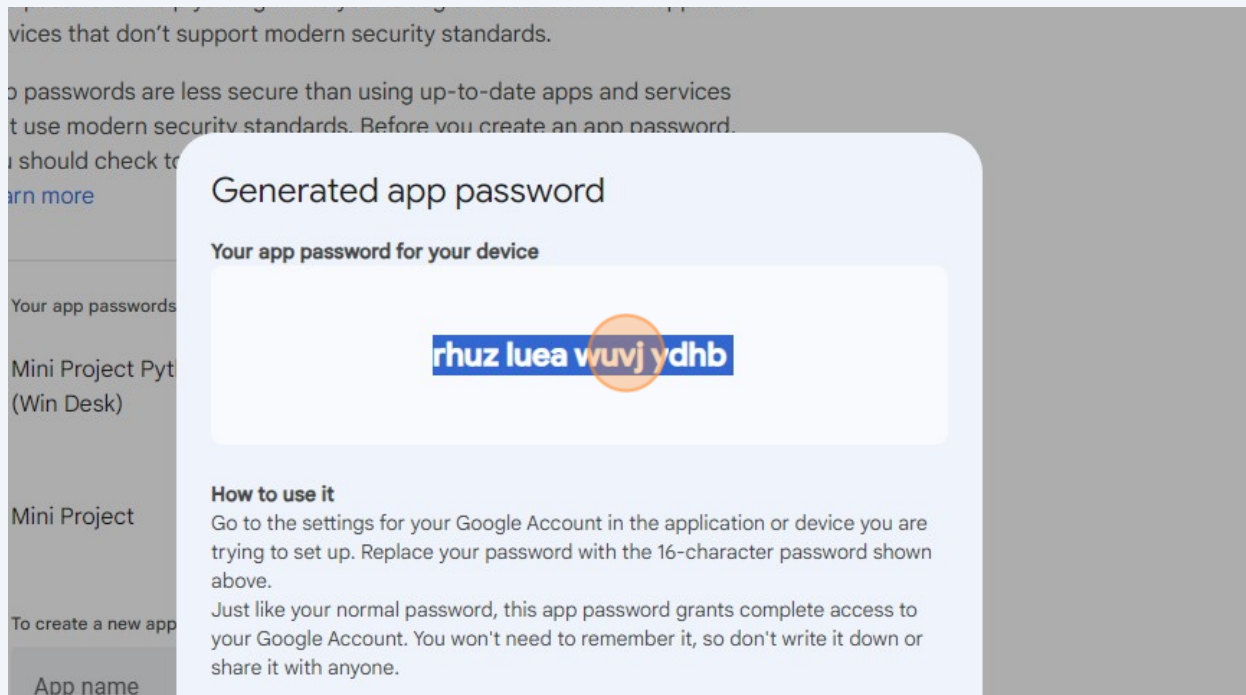

**6** Type "Mini Project" in "App Name" Field

**7** Click "Create"

A screenshot of a web form. At the top, there is a text input field containing the text "Mini Project". Below this, there is a label "new app specific password, type a name for it below..." followed by another text input field. The "Create" button is a blue pill-shaped button with the word "Create" in white text, and it is highlighted with an orange circle.

## 8 Copy the generated password

## 9 Click "Done"
